

Operations Planning, Training, and Integration

OPERATIONS CAPABILITIES INCLUDE:
 Operations Concepts Development
 Schedule and Resource Analysis
 Operational Training and Audit
 Logistics Analysis
 Operations Requirements Definition

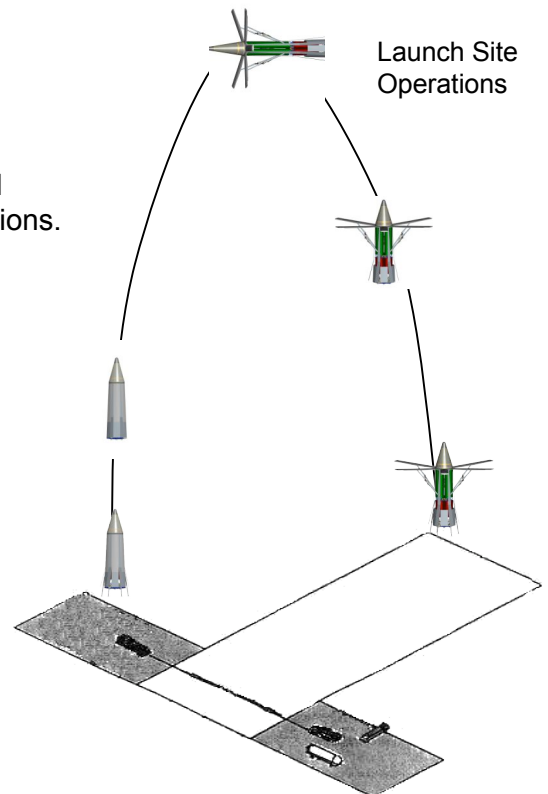

Remote Operations Facility Planning

TGV Inc. has extensive experience in NASA human space flight operations, commercial GEO and LEO satellite operations, and commercial and military launch systems.

TGV personnel have also developed training plans for commercial satellite operators and trained astronauts for Shuttle and ISS missions.

Commercial launch operations experience includes DC-X, Sea Launch, Ariane, Proton, Delta, and Atlas Launch vehicles in both domestic and foreign facilities. TGV has planned remote launch and operations facilities, and developed hardware and procedures for processing and integrating commercial payloads into the launch vehicle flow.

With this experience base, TGV can provide complete operational planning, including training and personnel requirements, hardware and software system design, and on-site consulting.
